Bryan told him that he hoped to be out and in a Rehab soon. He said "We hope you are too." The rash is still bad but they are not carrying him back to the doctor like Dr. James said he needed to be. He don't get water

(Monday Jan 12 2004)

Bryan didn't get his regular medicine tonight. He got 2 round white pills one was suppose to be Kolipin the other Penicillin one was white round with a M on it they think were stupid this was probabbb a Motrin. He's losing all since of really fast. They don't care. He can't get any water

(Tuesday Jan 13 2003)

Bryan got out of the hole to use the phone. One of the black inmates wanted him to 3 way a call for him Bryan refused. They had a fight don't know what the outcome is. Black guy name is Smoot they call him Fork Chop. Werdz and Ale Bradley both put this guy up to jumping on Bryan.

Friday Jan 16 2004

Bryan got real sick Ewere went to check on him and couldn't wake him up he shook him and slapped him in the face to get him awake Bryan was almost unconscience Brett OAKS carried him to the hospital in Alex City he was placed in ICU condition is serious. His urine is almost black they almost let him die. He has liver failure His stomach is swallow real tight both feet and legs are too.

Brett carried him in the hospital in hand cuffs. The doctor told him to get those hand cuffs off of him he was serious. Brett told Bryan you are one sick puppy. But he has been treated like a dog not a puppy. Sad sad.

The doctor said he was almost in a coma, his mental state is not good. He is in no mental condition to make any decisions on his own. Bryan said they made him sign something at the Jail before he left we don't know what. He is too sick to know.

Daniel slept for 6 to 7 hours and overall he has been compliant. At this stage I am not seeing any manic or hypomanic or depressive symptoms. He is attending selective groups. Lately he has been complaining of pain, and staff noted some med seeking behavior. Per patient, previously was on a higher dose of Percocet that was 2 pills q 6 hrs. but at present he is getting 1 tablet q 6 hrs. and at times he is taking it t.i.d. During my session he was in a fairly good mood, quite calm, and cooperative. Improved hygiene, improved ADL's. He is quite eager to leave the hospital, waiting to be seen by the orthopedist by the end of this week with plans to remove cast. At this stage, I will continue the present combination of medications. Patient's Tegretol level was in the low normal range. I have readjusted the dose.
